

## LCT bio.x A100

Thanks to its compact design, the LCT bio.x A100 brush washbasin is also suitable for smaller workshops and tight spaces without sacrificing functionality.

- compact design
- Ergonomic, user-friendly product design
- low power consumption thanks to energy-efficient heating
- maximum utilization of the work surface
- Optimal depth of the basin for good splash protection
- simple and user-friendly operation via push button
- the hinged top section ensures easy servicing, maintenance and repairs

With its easy-to-use concept and a large work surface, LCT A 100 provides a simple and comfortable cleaning system with a robust design. The space-saving device is made of reliable plastic components (PE) to ensure a long service life with consistently high quality. The system is portable and can be easily transported with a pallet truck. LCT A 100 uses a built-in filter system (coarse filter, fine filter, bag filter, and magnet) to absorb metals, dirt and other particles to avoid contamination of the circulating cleaning fluids.

LCT A 100 is operated with Bio Liquid environmentally friendly cleaners, whose long service life ensures long-lasting, consistent cleaning performance. Compared to traditional industrial cleaning solutions, LCT systems offer equivalent and in many cases increased cleaning performance - designed for sustainability, employee protection and environmental compatibility. It is the ideal alternative for environmentally conscious users and combines user friendliness and perfect cleaning results at attractive prices - without polluting the environment.

#### Technical data LCT bio.x A100

External dimensions W x D x H [mm]	1060 x 830 x 600
Usable surface W x D [mm]	700 x 480
Working height [mm]	800
Load capacity [kg]	100
Empty weight [kg]	45
Optimal fill level [l]	80
Minimum fill level [l]	60
Power consumption [W]	700
Heating [W]	650
Operating temperature [°C]	41

**Our LCT bio.x A100 can be used with the following non-labelled cleaners:**

**LCT Bio Liquid**

**LCT Bio Liquid Spezial**

**LCT Bio Liquid Power**

**LCT Kokoscleaner**

**LCT Kokoscleaner Alu**

**LCT Kokoscleaner low-foam**

- Ready-to-use solution for removing oils, grease, cutting coolants, etc. from metal parts
  - Natural water-based cleaning process with natural microorganisms for biological oil breakdown
  - Not subject to the Solvent Directive
  - Non-hazardous substance, no labelling requirement
  - No solvents, VOC-free, therefore protecting the user and the environment from harmful vapours
  - Cleaner is non-flammable and absolutely harmless
  - Very long product life
  - Consistently high cleaning performance
  - No special protective measures necessary
- Label-free in accordance with EU guidelines
  - VOC free
  - Pleasant aroma
  - Ready for use
  - Based on renewable raw materials from recycled products
  - Little effect on the user and the environment
  - Does not corrode the surface
  - Suitable for solvent washstands
  - Suitable for any material
  - Dissolves stubborn and heavy soiling
